Brand Essence

POSITIONING STATEMENT

**A marketing expert who happens to sell real estate —
not a real estate agent who happens to post on Instagram.**

— Dana Massey, REAL Broker

Brand Personality

Elevated but Inviting

Signals taste and lifestyle without feeling unattainable

Warm & Grounded

Rooted in natural materials, earthy textures, and honest communication

Expert Authority

15+ years of marketing expertise, PSA-certified pricing, local roots

Concierge-Level Care

White-glove experience from first conversation to well past closing

Straight Talk

No fluff, no corporate script — results and honesty

Visual Direction

Organic Modern

Clean, contemporary lines softened with natural materials and warmth.
Think wood grain, linen, rattan, woven textures, and stone.
Fluted details, rounded silhouettes, and intentional simplicity.
Nothing cold or sterile — every visual should feel like a home
you'd want to live in, not just photograph.

Color Palette

Six colors. Clear hierarchy. Every one grounded in the organic modern aesthetic.

Core Palette

Deep Espresso
#3A2A1E

Warm Brown
#524136

Camel
#B79782

Warm Stone
#C8C3B9

Linen Cream
#EFEDE8

Sage Green
#8B9A7B

Color Roles & Usage

Deep Espresso
Primary text, dark backgrounds, headers. Replaces pure black everywhere.

Warm Brown
Secondary text, subheadings, icon fills, subtle UI elements.

Camel
Accent highlights, buttons, call-to-action elements, divider lines.

Warm Stone
Borders, card backgrounds, secondary containers, muted text.

Linen Cream
Page backgrounds, light sections, breathing space between content.

Sage Green
Accent color (10–15% of visual space). Feature callouts, tags, fresh pops of life.

IMPORTANT: Never use pure black (#000000)
Always substitute Deep Espresso (#3A2A1E) for black in all brand materials.
This keeps the warmth and cohesion of the organic modern palette intact.

Typography

Two font families. Clear roles. Consistent across every touchpoint.

Primary Font — Sans-Serif Workhorse

NUNITO SANS

Heading Style

Subheading Style

Body text looks like this. Clean, readable, warm but professional.
This font does 90% of the work across all materials.

USE FOR: Headings · Subheadings · Body text · Captions · Social posts · Website · Documents

Accent Font — Script / Signature

HALOW DUO SCRIPT · FALLBACK: SIGNATURE

DM *dana massey*

Reserved for the logo mark and one special use only (titles OR quotes, never both). Think of it like jewelry — one statement piece per design.

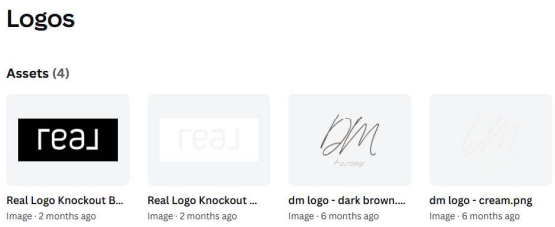
USE FOR: Logo · Feature titles on hero graphics · Pull quotes (pick one, not all)

Typography Rules

- Never use more than two font families in a single design.
- Drop the serif font entirely — it's a third voice that muddies the system.
- Use ALL CAPS sparingly — subtitles and labels only, with wide letter spacing.
- Default text color: Deep Espresso (#3A2A1E), never pure black.
- Script font should appear no more than once per layout.
- Minimum body text size: 10pt for print, 16px for digital.

Logo Usage

You have two logo systems: your personal DM mark and the REAL Broker mark.



Primary Mark — DM Script Logo

Dark Brown version Use on light/cream backgrounds (Linen Cream, Warm Stone)

Cream version Use on dark backgrounds (Deep Espresso, Warm Brown)

Minimum clear space Half the logo height on all sides — no crowding

Do not Place on busy photo backgrounds without a solid or semi-transparent backing

Secondary Mark — REAL Broker

Knockout Black Use where brokerage compliance requires a visible broker logo

Knockout White Use on dark backgrounds for the same compliance situations

Placement Always secondary to the DM mark — smaller, lower, or in a footer position

Never Let the REAL logo compete visually with the DM personal brand mark

Logo Don'ts

- ✕ Never stretch, skew, or alter proportions of either logo.
- ✕ Never place the DM script logo directly on a photograph without a backing shape.
- ✕ Never use pure black (#000000) as the logo color — use Deep Espresso.
- ✕ Never add effects (drop shadows, glows, outlines, gradients) to either mark.
- ✕ Never rotate the logos.
- ✕ Never use both the DM mark and REAL logo at the same visual weight.

Application Guidelines

How to apply the brand system consistently across all touchpoints.

Social Media

- Background colors: Alternate between Linen Cream and Deep Espresso for contrast.
- Text overlays: Deep Espresso on light backgrounds, Linen Cream on dark ones.
- Accent pops: Use Sage Green or Camel for tags, highlights, or small graphic elements.
- Photo treatment: Favor warm, natural-light imagery. Avoid harsh filters or cool tones.
- Templates: Build 3–5 repeatable templates (quote card, carousel, tip graphic) in these colors.
- DM script logo: Subtle watermark corner placement, not dominant.

Listing Presentations & Documents

- Cover page: Linen Cream background, Deep Espresso text, DM logo centered.
- Interior pages: Use Warm Stone for section dividers and card backgrounds.
- Charts and graphs: Pull from the full six-color palette for data visualization.
- Headers: Sans-serif primary font, bold. No script font in presentations.
- Page numbers and footers: Camel color, small, understated.

Website

- Primary background: Linen Cream (#EFEDE8) — not stark white.
- Text: Deep Espresso (#3A2A1E) — never pure black.
- Buttons and CTAs: Camel (#B79782) with Linen Cream text.
- Hover states and active elements: Sage Green (#8B9A7B).
- Cards and sections: Warm Stone (#C8C3B9) for subtle separation.

Print — Business Cards, Signage, Mailers

- Business cards: Deep Espresso card stock with Linen Cream text, or inverse.
- Direct mail (expired listings): Linen Cream envelope, Camel accent, clean layout.
- Signage: DM logo prominent, REAL Broker secondary, Sage Green accent optional.
- All print: Request Pantone matches from your printer for Camel and Deep Espresso.

Quick Reference

Pin this page. Reference it every time you create anything for the brand.

Colors

#3A2A1E	#524136	#B79782	#C8C3B9	#EFEDE8	#8B9A7B

Fonts

Primary (90%): Nunito Sans — all text, headings, body

Accent (10%): Halow Duo Script (or Signature) — logo mark, one special use per design

Never: Serif fonts. More than two families. Pure black text.

Logos

Primary: DM Script Mark (dark brown on light / cream on dark)

Secondary: REAL Broker (compliance only, always smaller than DM)

Clear space: Half the logo height on all sides

The Five Rules

1. Never use pure black. Deep Espresso (#3A2A1E) everywhere.
2. Two fonts maximum. Nunito Sans primary, Halow Duo Script accent.
3. Script font appears once per design, maximum.
4. Sage Green is the accent — 10–15% of visual space, never dominant.
5. Every visual should feel warm, grounded, and intentional.

Elevated but inviting. Warm but professional. Organic modern, always.
